LANDSCAPE OPERATIONS

SKID STEERS / COMPACT TRACK LOADERS / COMPACT EXCAVATORS / COMPACT WHEEL LOADERS / ATTACHMENTS

POWER THINGS UP

GOOD TO GROUNS

Whether your business is design and installation, mowing and grounds care, or all of the above, you can trust the extensive line of John Deere landscaping equipment to help you cultivate a thriving operation. From our L-Series Compact Loaders; to our small-, mid-, and large-frame G-Series Skid Steers and Compact Track Loaders; to proven G-Series Compact Excavators; to the more than 100 John Deere Compact Construction Equipment attachment options that connect interchangeably across our compact product range, our owner- and operator-friendly applications make quick work of any landscape job. *LET'S GET TO WORK.*

HERE'S THE BIG IDEA. IN A MID-FRAME OF MIND

Loaded with state-of-the-art enhancements, our mid-frame 320G and 324G Skid Steers and 325G Compact Track Loader (CTL) deliver outstanding pushing power and bucket breakout forces, for the tractive effort and leverage to shape the land, handle heavy pallet loads, and power through piles of rock and mulch. With toughness, comfort, and attachment versatility, they also feature flexible control choices and programmable performance settings to match specific jobsite requirements. And they work capably in close quarters and are easy to trailer. Customer-inspired options include rearview camera, deluxe LED side lighting, heated seat, Bluetooth[®] radio, hydraulic self-leveling, and ride control. Picture the possibilities of a John Deere G-Series mid-frame.

Room with a view

Front, sides, and rear – virtually unobstructed sightlines give you a clear view in all directions.

Designed to do more

Reimagined vertical-lift design enables the boom to rise higher and reach farther, for quick and easy loading.

FT4 diesels

Turbocharged* EPA Final Tier 4 (FT4)/ EU Stage IV engines meet rigid emission standards, run smooth, and pack plenty of power and torque. *Optional on the 320G Skid Steer.

Clean and easy

Cab foot-well system reduces cleanout time by half compared to E-Series models.

On the double for fast work cycles.

Standard 2-speed transmission delivers travel speeds up to 11 mph,

High performance

Trim cycle times and speed production in repetitive boom applications with the optional electrohydraulic (EH) boom performance package.

OUTDOOR. POWER. MANY SIZES FIT ALL

With their wide range of models and options, John Deere G-Series Skid Steers and Compact Track Loaders (CTLs) are some of the most versatile machines in the landscaping industry. Compact frames and clear sightlines make navigating jobsites a breeze. Impressive power and torque handle almost any load with ease. Choose radial lift for improved digging, grading, and backfilling. Or select vertical lift for increased stability and height when loading and lifting.

When bigger is better

Featuring additional lift height and reach, greater boom and bucket breakout forces, and more horsepower than their small-frame siblings, large-frame 331G and 333G CTLs and 330G and 332G Skid Steers are built to easily conquer your most challenging landscapes.

Get on board

Onboard grade indicate* lets operators assess, adjust, and monitor grade without leaving the cab. With Slope Control,[†] they can automatically maintain blade position without external lasers or GPS. Laser Slope Control offering delivers even more precise grade abilities. Fully integrated SmartGrade^{™†} enables intuitive crawler operation for precise grading control.

*Optional on all large-frame models. [†]Available only on the 333G CTL.

Pushing ahead

Outstanding pushing power and impressive breakout forces deliver sure-footed traction and leverage.

Trimmed to slim

Slimmed-down wheel options enable small-frame 316GR and 318G Skid Steers to easily fit through openings as narrow as 60 inches.

Movable assets

Weighing only 6,180 to 8,423 pounds, G-Series small-frame compacts are easy to trailer behind a standard pickup.

Feel the boom

Electrohydraulic (EH) boom performance package on large-frame models provides bucket self-leveling in both the up and down directions, and programmable return-to-dig, return-to-carry, and boom-heightkickout settings to ease highly repetitive load-and-carry tasks.

TAKE PRODUCTIVITY FOR A SPIN. **RELIABLE REVOLUTION**

Slip easily into close quarters. Deftly move materials around obstacles. Our agile G-Series Compact Excavators — in a range of six landscape-ready models – combine a variety of customer-inspired features such as independent swing boom and 360-degree rotation, to increase your operation's capabilities - and your bottom line.

Hydraulic retraction

quick work of obstacles.

It's easy to see

Ready to work

With increased lift capacity is an ideal addition to your landscape lineup.

The variable-width undercarriage of the 17G hydraulically retracts, providing passage through narrow openings and into tight quarters.

Zero- and reduced-tail-swing designs combined with independent-swing boom and 360-degree rotation make

Spacious operator stations feature wide entryways and expansive all-around visibility. 35G/50G/60G front glass is 2-inches wider and 6-inches taller than previous models.

and improved breakout forces over previous models, the 30G

All about economy

Power/economy modes optimize power for digging applications while improving fuel efficiency.

Get in and get comfortable

The 26G and 30G feature swing booms and foldable travel pedals positioned to ease operation and maximize footroom.

Dig this

Lighter weights and compact dimensions make these machines perfect for "dig-and-go" jobs. Enlarged tie-down openings allow them to be secured with the same-size chains used on your larger equipment.

Form an attachment

Standard coupler accepts a wide variety of John Deere Compact Construction Equipment attachments such as scrap grapples and hydraulic hammers.

FIT IN AND STAND OUT. COMFORTABLE CAPABILITIES

With a multipurpose 344L, 324L, or 244L, or a low-profile 304L or 204L, the range of tasks you can tackle is always within reach. Narrow machine widths and exceptional reach help these compact crowd-pleasers easily fit in, even on jam-packed jobsites. Operators can enjoy expansive visibility from the spacious, comfortable cab. No matter which model you choose, you'll experience easy maintenance, rock-solid stability, and the versatility to turn things loose.

High achievers

With up to 3-foot 1-inch reach and 8-foot 7-inch dump clearance, the 204L and 304L are highly able alternatives to skid steers for loading trucks or placing pallets.

Moving on

2-range hydrostatic drivetrains deliver infinite travel speeds up to 25 mph on the 344L.

Stack it up

Increased reach and height to hinge pin make 344L and 324L High-Lift models especially adept at piling materials and stacking lighter loads.

Connection without interruption

Optional skid-steer-style coupler can be actuated by push button to quickly and easily connect or release attachments without leaving the seat.

Low overhead redefined

At just up to 8-feet tall, our 204L and 304L deliver lower clearance than many other wheel loaders in their class — and are a full foot lower than our 244L.

Smooth operators

Industry-exclusive Articulation Plus[™] steering system on the 344L, 324L, and 244L enables tight turns with large loads, delivering more turn-tip capability and stability than standard articulation loaders.

Linked in

Loader linkage on the 244L, 324L, and 344L increases the lift path to near parallel, for improved fork operation and greater holding force than previous models.

Nursery Forks

Firmly grasp and transport large rocks, light boulders, and balled and burlapped landscape stock up to 44 inches in diameter.

UNLIMITED POSSIBILITIES

Whether you're hoisting pallets, moving sod, or clearing brush, durable John Deere Compact Construction Equipment attachments optimize your performance and productivity. Nursery forks, planetary augers, power rakes, and more — with over 100 add-ons to choose from, your John Deere compact machine is a flexible tool for virtually any landscaping task.

KEY: SS Skid Steer CWL Compact Wheel Loader CEX Compact Excavator CTL Compact Track Loader

1. Quik-Tatch"

You can go from bucket to grapple to whatever in no time flat with the universal, self-cleaning Quik-Tatch easy-attachment system.

SS CWL CTL

SS CTL CEX

2. Mulching Heads

The MH60D for large-frame skid steers and CTLs easily shreds woody materials into beneficial mulch and removes underbrush, trees up to 8 inches, and stumps up to 12 inches. ME36 and ME50 models for compact excavators are great for right-of-way maintenance, fire/fuel reduction, and clearing standing or felled trees and brush in difficult-toreach places.

3. Angle-Tatch

Connecting to the Quik-Tatch coupler for attachment tilt up to 14 degrees left or right, the Angle-Tatch enables buckets, blades, and other non-hydraulic add-ons to rotate for more precise grading and leveling without leaving the seat of the machine.

4. Rotary Cutters

Designed for land and vegetation management, our rotary cutters clear, cut, and fell heavy-duty brush and hardwoods up to 10 inches in diameter. With their excavator-style reach, our new RE models are perfect for maintaining embankments, ditches, and other hard-to-reach areas.

5. Rotary Tillers

Rotary tillers feature rugged construction, heavy-duty tines, and a tilling depth to 6 inches. Bidirectional operation with heavy-duty adjustable leveling board increases efficiency in forward and reverse.

SS CTL

6. Vibratory Rollers Choose the width and compaction force you need in padded or sheep's-foot configurations.

SS CWL CTL

7. Plate Compactors Designed for trench, slope, and excavation compaction, plate compactors are available in widths from 13 to 24 inches. CEX

8. Buckets

Numerous multipurpose, construction, dirt, foundry, utility, tooth, rock, grading-heel, lightmaterial, and rollout buckets are available in varying widths and capacities.

SS CWL CTL

9. Scrap Grapples

A pair of independent-action, hydraulic-powered grapples grasp and retain objects of different sizes. Ample grapple opening enables the handling of large payloads.

SS CWL CTL

10. Roller Levels Unique front roller delivers control for contouring, grading, cutting, and smoothing flat or significantly

sloped terrain.

11. Trenchers

Choose 36-, 48-, and 60-inch digging depths in high- and low-flow versions. Heavy-duty drive system eliminates chain reduction.

SS CTL

12. Augers

Planetary drive with reverse rotation provides fast digging and quick back-outs. Choose from a variety of bit styles and diameters.

SS CWL CEX CTL

13. Pallet Forks

Available in lengths of 42, 48, and 60 inches, our pallet forks feature a brick-guard design for protection against load damage. SS CWL CTL

14. Brooms Angle and pickup styles are

available. Heavy-duty hightorque drive motors promote long-term dependability.

SS CWL CTL

15. Rock Grapples

High grapple forces, wide grapple capacities, and weld-in serrated cutting edges make rock grapples ideal for tasks such as land clearing, jobsite cleanup, and brush removal.

16. Snow Blowers

2-stage hydraulic blowers throw snow up to 45 feet. Simplified direct-drive hydraulic-motor design eliminates chains and sprockets. Bolt-on, wear-resistant tapered steel edges are simple to replace, and skid shoes adjust easily.

SS CWL CTL

17. Snow/Utility/V-Blades

Blade angles hydraulically 30 degrees right or left. Trip springs help protect machine from sudden impacts.

SS CWL CTL

18. Snow Pushers

Quickly and efficiently remove large accumulations of snow from sidewalks, parking lots, and driveways. Available pullback edge is ideal for work in confined areas and around obstructions.

Get details about individual attachments. Visit the Compact Construction Equipment attachments section at JohnDeere.com/ compactattachments

Power Rakes

Perfect for seedbed or site prep, power rakes feature easy forward and backward operation. Adjustable end plates provide box-scraper-like performance.

SS CTL
