

# PRODUCE

## ***GREEN-GARD™ Hay Preservative***

Fresh, quality bales for your herd are the basis of a successful hay operation. And with John Deere GREEN-GARD Hay Preservative, you can retain the freshness, color and quality of all types of hay by inhibiting mold growth, heating and spoilage.

## ***Double-Tie Knotter System***

Choose from either a mechanical or electrical trip system and deliver bales to your herd in great shape. With fewer connection points and fewer feet of grease lines to maintain, you can get started baling faster and ensure reliable knotting, even in the most difficult baling conditions.

## ***Precutter Settings***

Size your crop before baling and mixing with our precutter options. All three models offer a drop floor, making maintenance or repairs easy. Select 13, 7, 6 or 0 knives to engage with the L331 baler, while choosing between 21, 11, 10 or 0 knives with the L341 balers.
