

Exceptional powertrain and hydraulic performance helps maintain quick ground speed and boom lift, even on steep ramps, for faster cycles.

Impressive torque reserves top out at 57 percent in the 824K-II. It's a Deere loader advantage that helps maintain good boom and bucket speed in and out of the pile, for heaped loads, even in wet or hard-packed material.

Fluid-efficient Deere PowerTech™ diesels provide generous displacement, power, and lugging ability.

Low center of gravity and optimized fore-and-aft balance deliver solid stability and full-turn tipping-load capacities.
